

Hip, Hip HOORAY!

Dr. Foster Performs Hip and Knee Replacements

A common reason for hip or knee replacements is arthritis....and the hips are a prime target for arthritis! Dr. Scott Foster performs routine and complex hip and knee replacements, returning patients to their active lifestyles. So if you're experiencing constant hip or knee pain, consult with Dr. Foster, who cares for patients in Ontario, Bucyrus, and Marion. After a hip or knee replacement, you too could be shouting "Hip, Hip, Hooray"!

Dr. Foster manages complex primary replacement conditions for a patient's knee or hip, such as arthritis, infection, instability, wear, and implant failure. He performs muscle sparing anterior hip replacement utilizing the HANA table which provides benefits such as less tissue disruption, smaller incision, less pain, earlier discharge, and quicker recovery.

Dr. Scott Foster is Fellowship Trained in Primary and Revision Hip and Knee Replacement
